

SELENE 50 VOYAGER SEDAN

Classic cabin yacht

BOUND FOR EXOTIC PLACES

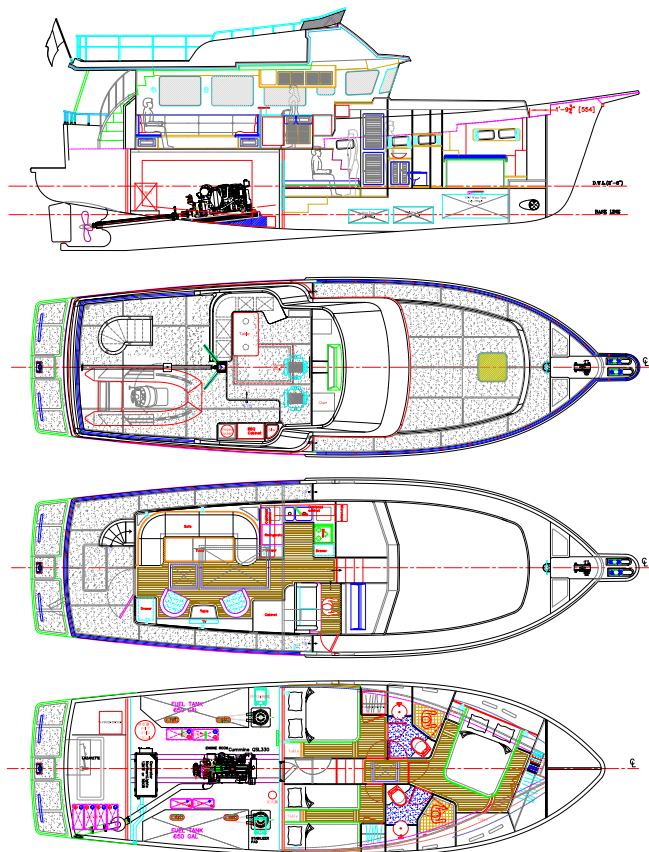

The Selene 50 Voyager Sedan is a larger sibling of the 42 Sedan model, with a larger super structure and the same European flair. The yacht has a beautiful teak or optional cherry interior, and a well-equipped sea-going U-shaped galley to port. Compared with the Selene 42, it offers one more cabin and head, a more spacious salon and more storage. For many people, the large flybridge will be the highlight of this yacht with its optional hardtop. The original design of the owner's cabin located forward with a walk around berth athwartships leaves more space for nightstands and large wardrobe lockers. The Selene 50 epitomizes gracious styling and transports her passengers with the uppermost in comfort and performance... The Selene 50 sports all the features of a luxury family yacht with a generator, climate control, roomy cabins and a large sociable salon, always with elegance, simplicity and easy maintenance for the owner-operator. Like her smaller sibling, the Selene 50 is also a long-range gentleman's yacht ready to take you to faraway exotic places. With this new yacht, the Selene Voyager series continues to build upon Selene Yachts' tradition of combining the highest level of individualized craftsmanship with superlative design. The first Selene 50 was delivered to North America in 2015.

Choosing a boat is one of the major decisions in a captain's lifetime... This is why, since 1999, Selene Yachts teams have understood that they must pay the highest attention to the owner's expectations. It's with pride we call ourselves "Qualified Dream Builders". This means that we have to blend in perfect harmony « Grace and Strength » but also our client's lifestyle and the stringent constraints of sailing on a safe and beautiful yacht, but an at a reasonable cost. After having built 400 yachts over twenty years in our factories, we are experts at that very unique exercise. Creative layout, livable family-friendly interiors, high quality of our design, joinery, varnish and upholstery are only some of our hallmarks. Our shipwrights have decades of experience in boat building, and we have zero tolerance for squeaking floors or poorly adjusted locker doors or drawers that you often find on many production boats after some months of sailing. Our doors for instance have a rubber seal inserted in the frame to damper vibrations, and our hinges and locks are first class hardware. Twenty years after her launching, the interior of a Selene Yacht will look as good as new, this is why our boats retain such a high value in the preloved yachts market...
